

## Hub Group, Inc.

**Phillip C. Yeager**  
Chairman  
Hub Group, Inc.

### Company Mission

*To provide world-class logistics solutions that consistently exceed customer expectations.*

With more than 30 years of experience, Hub Group is better than ever. The company has steadily expanded its core expertise in intermodal transportation to become a leading non-asset-based North American third-party logistics provider. Its broad range of customer-focused transportation and logistics services currently offers today's shippers proven intermodal transit; highway services; and dynamic, flexible and integrated logistics management execution solutions that save costs and drive profits.

Hub's premier service network of automated field offices, strategic relationships with 5,000 carriers and best-of-breed information technology services provides the flexibility necessary in today's logistics industry to quickly adapt to changing business environments. Hub avoids fixed costs and identifies the best value-chain solutions available for customers across transportation modes. Today, a broad range of shippers continue to rely on Hub Group to administer their transportation and distribution process — in a cost- and service-efficient manner.

Hub utilizes sophisticated tactical and strategic modeling tools to identify win-win solutions with the shortest time-to-savings ratio for shippers by developing transportation strategies that measure critical supply-chain initiatives against components such as: strategic transportation sourcing, carrier rate negotiations, improvement of delivery predictability, real-time inventory visibility, reduction of order cycle time, reduced inventory levels, optimization of inbound and outbound transportation, and cost and service efficiencies. Hub then executes logistics solutions with best-of-breed TMS technology and proven business processes, performing a cost analysis of each customer's freight spend to identify process improvements and cost-reduction opportunities to meet specific transportation and value-chain requirements.

For more information about Hub's intermodal, logistics and highway services, please visit the company's Web site at: [www.hubgroup.com](http://www.hubgroup.com), or call (800) 964-2515.
