

Donald Maltby
Executive Vice President

Mission Statement:

To provide optimal supply chain solutions that meet the customer-specific logistics requirements of our diverse customer base.

Unyson Logistics prides itself on its collaborative, analytical and cost-effective approach to value chain initiatives that enables customers to realize cost and service efficiencies while improving revenue streams.

Our specialized services allow us to offer customers a wide variety of supply chain options that include: technology solutions, trained resources, purchased transportation, multi-modal expertise, railcar services, transportation and management execution, expedited air and ground transportation and operations support on a 24/7 basis.

All this with the support of a \$1.4 billion transportation company.

PROVIDING OPTIMAL SUPPLY CHAIN SOLUTIONS

As a third party logistics provider owned by a major transportation company with more than three decades of experience, Unyson Logistics offers customer-focused supply chain solutions backed by a strong financial foundation.

Our success is based on a formula that enables us to collaborate with customers to create value chain solutions that help drive the costs and inefficiencies out of the logistics process. We call this analytical and cost-effective process the “Power of Y.” By creating 10 strategic, measurable drivers of supply chain performance, our unique specialized services approach to value chain solutions optimizes each customer’s requirements to their specific logistics circumstances.

Unyson offers 10

strategic supply chain benefits that work in concert to assist your company in adding value to your bottom line.

- ❑ **Unity** – Your supply chain is aligned and your company, as a whole, is more unified.
- ❑ **Visibility** – End-to-end visibility bolsters the performance of your distribution network.
- ❑ **Technology** – Your IT infrastructure delivers more strategic value and quantifiable results.
- ❑ **Capability** – Experienced, focused logistics professionals elevate your supply chain’s performance.
- ❑ **Stability** – Your organization grows stronger, as the operational side performs more reliably.
- ❑ **Opportunity** – Your supply chain costs are driven down,

while service to all your stakeholders improves.

- ❑ **Velocity** – Your cycle times shorten, accelerating your speed to market.
- ❑ **Flexibility** – Your company responds swiftly to market dynamics, its competitive edge sharpened.
- ❑ **Delivery** – Your logistics team creates better solutions, and accountability takes hold throughout your organization.
- ❑ **Integrity** – Operational excellence and shared accountability permeates your supply chain.
