

Randy Richards to Lead Global Sales for FreightScan, LLC

- Industry Veteran Spearheads Expansion of Dimensioning and Security Products -

Carlsbad, California, February 10, 2009 – FreightScan, LLC, a leader in the development and deployment of innovative technology solutions for the freight and logistics industry, announced it has secured the services of Randy Richards, the former Vice President of Cargo Sales and Services at US Airways, as the Executive Vice President of Sales and Service for FreightScan.

Mr. Richards is a recognized leader in the cargo industry with more than 17 years of experience in express, freight forwarding and air cargo services. He began his career at Emery Worldwide in 1991 in sales, moving to CEVA Logistics (formerly Eagle) in 1994, where he took on positions of increasing responsibility, from sales, to station manager to corporate sales manager. Mr. Richards next served as Director of Operations for AIT Worldwide Logistics from 2000 until 2002, when he joined America West, which later merged with US Airways in 2005. During his tenure with US Airways, Mr. Richards increased global sales to \$150 million, and successfully integrated two airlines into one seamless organization. Most recently, he led the company to the innovative shift of using a single source supplier for all European ground handling.

“Bringing a leader of Randy Richard’s caliber to the FreightScan team demonstrates that we are committed to establishing a global installation base for our automated dimensioning systems and security solutions across the industry,” said André Johnson, CEO of FreightScan. “His extensive knowledge and experience adds a critical industry perspective to the development and deployment of FreightScan’s products. In these challenging times, all aspects of the cargo business are looking for new ways to improve profits. FreightScan does this utilizing a minimal capital investment, and Randy is uniquely qualified to share the many benefits of FreightScan’s products with the global cargo industry. We are extremely pleased to have him on board.”

FreightScan offers two classes of products: cargo dimensioning and cargo screening. Its groundbreaking automated dimensioning systems include the *FS100*, an overhead mounted scanner for cargo facilities, and the *FL1000*, the world’s first forklift-mounted dimensioning scanner. FreightScan has recently introduced *CargoVizion™*, the only cargo screening solution that detects and locates potential threat objects and materials.

“FreightScan can provide leading technology at a time when airlines, handlers and forwarders are looking to control costs,” commented Randy Richards. “I have had six tremendously exciting and productive years with US Airways and it has been a great pleasure to head the integration of two airlines. I leave US Airways with many fond memories. I also feel honored that a dynamic company such as FreightScan, and the investors behind it, has determined that I am the right person to expand the Company to the next level of sales and service. FreightScan now has viewing facilities located with key clients across North America and Europe, and our aim is to be THE market leader in dimensioning and security technology in the air cargo business.”

ABOUT FREIGHTSCAN

FreightScan, LLC is a leader in the development and deployment of innovative technology solutions for the freight and logistics industry. Its groundbreaking automated dimensioning systems include the *FreightScan FS100*, an overhead scanner, and the *FL1000*, the world’s first forklift mounted scanner.

Utilizing revolutionary D.I.M.M. Tech™ (Defined Imaging and Multiple Measurement Technology), the *FS100* and *FL1000* have the capability to scan cargo in all configurations within seconds, providing companies with the ability to maximize warehouse resources, establish accurate billings and significantly improve revenues and profit performance. FreightScan has also recently introduced CargoVizion™, a cargo screening system that provides non-radiation technology for detecting and locating potential threat objects and materials. Logistics industry segments it serves include air freight, ground freight, rail freight, sea freight, multimodal transportation and container logistics.
