

**FreightScan CEO André Johnson to Testify Before U.S. Committee on
Homeland Security on March 18, 2009**

- Will Appear Before Subcommittee on Transportation Security and Infrastructure Protection -

Carlsbad, California, March 16, 2009 – At the invitation of Bennie G. Thompson, Chairman of the House Subcommittee on Transportation Security and Infrastructure Protection, André L. Johnson, chief executive officer of FreightScan, LLC, a leader in the development and deployment of innovative technology solutions for cargo scanning and screening, will appear before the Subcommittee and provide testimony on air cargo security in Washington, D.C., on Wednesday, March 18, 2009.

The hearing, entitled "100% Air Cargo Screening: Can We Secure America's Skies?" will take place at 2 p.m. in the 311 Cannon House Office Building. It is open to the press.

Mr. Johnson's testimony will address how entrepreneurial companies such as FreightScan are developing new cargo screening technologies and working with TSA to find solutions for screening 100% of cargo without disrupting the flow of commerce. FreightScan's *CargoVizion™* screening system is a new security product that is currently being tested for inclusion on the Qualified Product List, or QPL, to contribute to the industry's ability to meet the 2010 deadline for screening 100 percent of cargo transported on passenger planes. We hope you will be able to attend this important event. Please contact us if you have any questions.

ABOUT FREIGHTSCAN

FreightScan, LLC is a leader in the development and deployment of innovative technology solutions for the freight and logistics industry. Its groundbreaking automated dimensioning systems include the *FreightScan FS100*, an overhead scanner, and the *FL1000*, the world's first forklift-mounted scanner.

Utilizing revolutionary D.I.M.M. Tech™ (Defined Imaging and Multiple Measurement Technology), the *FS100* and *FL1000* have the capability to scan cargo in all configurations within seconds, providing companies with the ability to maximize warehouse resources, establish accurate billings and significantly improve revenues and profit performance. FreightScan has also recently introduced *CargoVizion™*, a cargo screening system that provides non-radiation technology for detecting and locating potential threat objects and materials. Logistics industry segments it serves include air freight, ground freight, rail freight, sea freight, multimodal transportation and container logistics.
