

**FreightScan Named Finalist in *International Freighting Weekly's* 2009
Freight Industry Awards**
- Nominated In *IFW's* Innovation Award Category -

Carlsbad, California, July 30, 2009 – FreightScan, LLC, a leader in the development and deployment of automated dimensioning systems for the freight and logistics industry, has recently been nominated by *International Freighting Weekly (IFW)*, a UK-based publication, as one of the finalists for its 2009 *Freight Industry Awards* in the category of Innovation. In its 13th consecutive year, the 2009 Freight Industry Awards event will be held at the Chelsea Football Club in London, England, on Thursday, October 15, 2009.

Companies were invited to submit entries describing how they have demonstrated freight transportation innovation and excellence or improved its service or product offerings within the area covered by its category. The awards event will recognize those companies that have exceeded expected levels of performance and service within the transportation sector it serves. Entries are evaluated against the set of entrance criteria by a team of six independent judges, who select a shortlist of the best entries and an overall winner for each category.

"We are thrilled to be nominated as a finalist for this significant award from *IFW* magazine," said Sheri Ascencio, Executive Vice President, Marketing for FreightScan. "Our company has strived to become a leader in the cargo scanning and dimensioning arena, and through a great deal of hard work we have successfully created a viable, economical dimensioning solution for virtually all segments of the freight industry. FreightScan is very appreciative of being considered for the *IFW* Innovation Award this year."

ABOUT FREIGHTSCAN

FreightScan, LLC is a leader in the development and deployment of innovative technology solutions for the freight and logistics industry. Its groundbreaking automated dimensioning systems include the *FreightScan FS100*, an overhead scanner, and the *FL1000*, the world's first forklift-mounted scanner.

Utilizing revolutionary D.I.M.M. Tech™ (Defined Imaging and Multiple Measurement Technology), the *FS100* and *FL1000* have the capability to scan cargo in all configurations within seconds, providing companies with the ability to maximize warehouse resources, establish accurate billings and significantly improve revenues and profit performance. FreightScan has also recently introduced CargoVizion™, a cargo screening system that provides non-radiation technology for detecting and locating potential threat objects and materials. Logistics industry segments it serves include air freight, ground freight, rail freight, sea freight, multimodal transportation and container logistics.
